

hwam 30

HWAM 30 is a compact and efficient stove which can heat up to 130 m².
An excellent choice for the smaller room as well as for the holiday cottage.

Design: Architect Anders C. Fæsterholdt

All stoves from HWAM have the patented automatic system.
It ensures an optimal combustion, because the air is automatically regulated.

intelligent heat

Technical specifications

Capacity in kW 2-7 kW
 Nominal heat output. 4,5 kW
 Smoke outlet. Ø150 mm
 Heating capacity (2.4 m. ceiling height) . 20-130m²
 Weight. 87 kg
 Colour options Black or grey

Test results

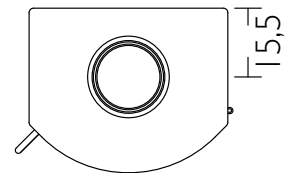

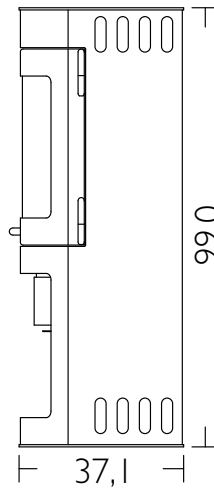

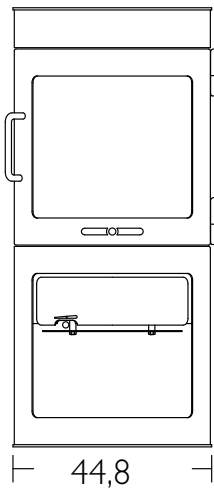

Flue gas mass flow (g/sec) 5.0
 Flue gas temperature (°C) 247°
 CO at 13% O₂ 0.08
 Efficiency, gross/net 80%
 Chimney draught, min. (rec.) 12 Pa

Approvals

EN 13240 (Europe)
 Art. 15a (Austria)
 NS 3058/3059 (Norway)
 LRV (Switzerland)
 Stuttgart, München, Regensburg
 HETAS approved

Options

Top flue outlet
 Wood section

Distance to inflammable materials

- 1. Back (cm, min.) 10
- 2. Sides (cm, min.) 20
- 3. From furnishing in front (cm, min.) . . . 80
- 1. Corner siting (cm, min.) 15

Distance to brick wall

Back (cm, min.) 10
