winner 2006

The latest, architect-designed wood-burning stoves from HWAM are fitted with specially designed sliding doors.

The clear advantage of the door's smooth, vertical motion is that ash does not escape when the door is opened. In all, it is well thought out, quality design.

You can read more about the many advantages of a HWAM wood-burning stove, including the HWAM Automatic, Ash Pot, CO₂ neutral stoves and the Swan eco-label approval, on www.hwam.com
